

5 STEPS TO OPENING YOUR RESEARCH.

Publishing open access with open select

With open select, we publish your article open access in a journal that also publishes papers only available to subscribers. This is often known as 'hybrid open access'.

1 Choose the open select journal that best suits your work

2 Write and submit your paper

3 Make any revisions, guided by peer reviewer and editor comments

4 When accepted, choose open access and let us know who will cover your article publishing charge (APC)

5 Select the Creative Commons license that's right for you

Publishing your article open access means it's available for anyone to read, anywhere, forever. You'll get:

Robust peer review:

expert objective evaluation before publication.

Online discoverability:

journals indexed in internationally recognized databases.

Visibility and impact:

anyone can read, cite and use your research.

Rapid online publication:

your results reach your readers who need them, quickly.

Freedom:

choice of Creative Commons licenses to comply with funder mandates and control how others use your work.

Publish your article at no cost to yourself or with a reduced APC if your institution or funder has an open access agreement or membership with Taylor & Francis. Ask your librarian.
